

Polymer Machine

The economically priced stamp making machine

Easy way to making plate

- A versatile platemaking system design for efficiency and productivity
- Low power consumption, low attractive and practical design

Product Description

Model	Tube Quantity	Exposure Area	Machine Size	No. of Flash Light	Power Supply
PM-A3	2	320x470mm	320x240x130mm	Up: 6 pcs Down: 6 pcs	240V/50 Hz
PM-A4N	2	200x270mm	290x130x160mm	Up: 6 pcs Down: 6 pcs	220V/50Hz
PM-A4 Exp	2	200x270mm	300x210x130mm	Up: 6 pcs Down: 6 pcs	220V/50Hz

Product Specification

CONTROL PANEL

The control panel is clearly defined and user-friendly. The menu is easy to navigate, which speeds up adjusting exposure times.

DOUBLE-SIDED EXPOSURE UNIT

This double-sided exposure unit with 6 lamps on the top and the bottom enables efficient and clean works.

INTEGRATED SPACERS

The spacers, integrated into the lower glass panel, match the text plate thickness.

SELF-ADHESIVE RUBBER

Pad which makes sticking the exposed polymer plate easy.

WASH OUT UNIT

The rotating wash out unit has a soft brushes ensure gentle washing.

BLOW PIPE

Used to eliminate the air bubbles that are formed when pouring in the resin.

POST-EXPOSURE

The plates achieve their optimum final thickness in the post-exposure.
